

Why This Matters

The Federal Emergency Management Agency (FEMA) provides public assistance to state, tribal, and local government, and certain types of private nonprofit organizations so that communities can quickly respond to and recover from major disasters or emergencies declared by the President. We perform audits of FEMA grantees and subgrantees to determine whether cost claimed under the awards are eligible and allowable under Federal regulations and FEMA guidelines. The City of Daytona Beach, Florida (City), received an award of \$3.0 million for damages resulting from Hurricane Charley that occurred in August 2004.

DHS Response

FEMA's written response is due within 90 days.

FEMA Should Recover \$234,034 of Public Assistance Grant Funds Awarded to City of Daytona Beach, Florida - Hurricane Charley

What We Determined

FEMA should recover \$234,034 of grant funds awarded to the City. Although the City generally accounted for FEMA funds according to Federal regulations and FEMA guidelines, its claim included \$234,034 (Federal share \$224,117) of questionable costs, which consisted of \$173,077 of unsupported equipment costs, \$55,551 of ineligible debris disposal costs, and \$5,406 of costs for small projects not completed.

What We Recommend

We recommended that the Regional Administrator, FEMA Region IV:

- (1) Disallow \$173,077 (Federal share \$169,256) of unsupported costs unless the City can provide additional evidence to support the costs claimed,
- (2) Disallow \$55,551 (Federal share \$49,996) of ineligible debris disposal costs claimed for lost landfill capacity from disaster-related mulch, and
- (3) Disallow \$5,406 (Federal share \$4,865) of ineligible costs for work not completed unless the City can provide additional evidence that it completed the project.
